

Artorias Remote Support

Secure remote access to the devices we manage for you

Welcome

Your machines are managed by Artorias so you can reach them from anywhere. This card gets you connected in about two minutes.

1. Install the app

You were given an installer file (or a download link) from Artorias. On your laptop, open it and follow the prompts. It installs a small, branded application — no configuration needed, it already knows where to connect.

2. Sign in

Open the app and enter the username and password we issued you. Check the box to stay signed in so you don't have to re-enter it each time.

3. Connect to a machine

After signing in, you'll see the list of **your** devices. Click a device, then click **Connect**. The first time, the machine may show a prompt to accept the connection — that's expected.

That's it. You're in control of your devices.

Good to know

- **Unattended access** — your managed devices stay available in the list, so you can reach them even when no one is sitting at them.
- **Always online** — leave the managed machines powered on (sleep may disconnect them temporarily).
- **Your access is limited to your own machines** — you won't see other organizations' devices, and they won't see yours.

Need help?

If the app won't connect, your password isn't working, or a device is missing from your list, contact us:

support@artoriastechlab.com

We'll get you sorted out.
